

Poly Floats and Pontoons

Features

JAG Poly floats come with a true 'closed cell' foam core. That added safety factor along with using corrugated float modules have made our innovative range possible to float from several kgs to several tonnes and allowed great flexibility in design applications. Check out just some versions available!

Single Floats

This one started it all- simple, optional foam core, lugs and fit for purpose- data sheet available

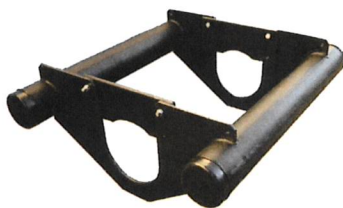

PFSF

Double Floats

Fitted with a central rigid platform

PFDF

Pipeline Floats

You don't have to float the pipe, just stop it from sinking. This supports the pipe just under the surface, even in tandem with power cables. PFDC

Design Registration
202010932

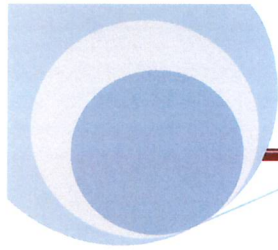

Float Modules

Our latest- huge range of sizes and buoyancies- can be rafted together at widths of your choice for stability but disassembled for transport

Keep intakes out of the mud to protect dam liners.
These have poly rails to help when dragging the float to shore.

Foot Valve/ Strainer floats
Designed to suit each application
PFDK+VFPS

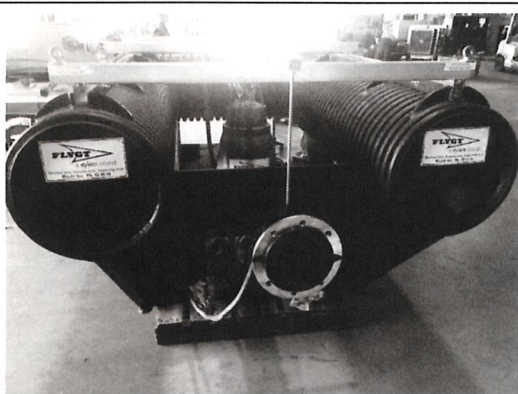

Double floats with Submersible
Pump Shroud PFDK+SPS

Single Float with Shroud hanger fin
The rigidity and size range of our
corrugated pipe floats allows single
units to replace doubles in cost
sensitive jobs- from 15kg to 1500kg
PFMCSH

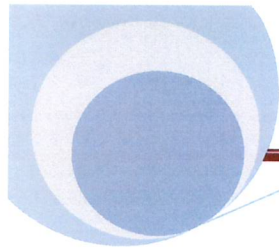

Wheeled floats
If you are very careful about dam
liners- ROLL don't Slide
PFDKW+VFPS

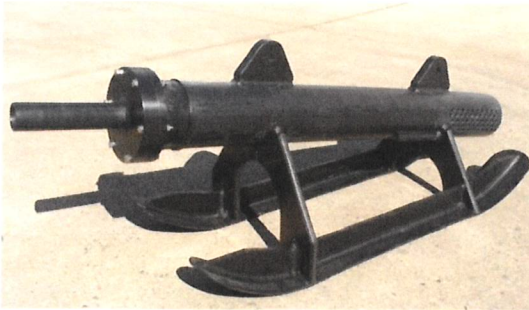

Don't let your pumps end up in the mud-
Floats custom made to handle all styles of submersible
pumps.
Borehole, dewatering, wastewater, contractor, irrigation.

Single float and submersible pump cooling shroud- This one has a protective 'mud foot' to keep it off the bottom

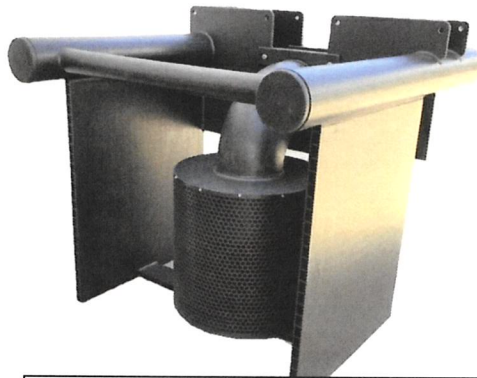

Subby shroud with 'mud skids'- can be hung under a single float

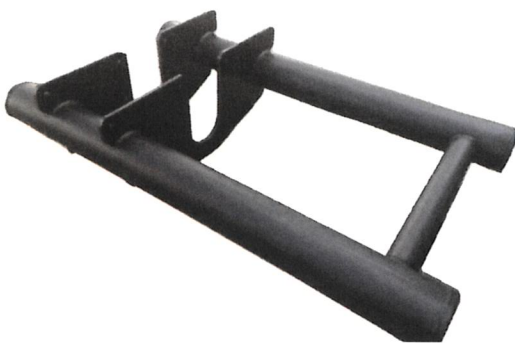

"Stand off" floats (They don't all come with striped shoes 😊)

PFSM

Liner safe Floating intake strainer

Just like our pipeline floats but this one can be used for hanging a foot valve, strainer or an upturned bubbler

PFDKF

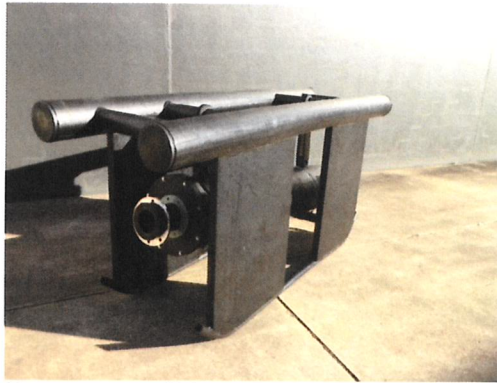

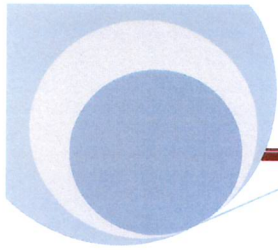

Wheels fitted to protect a pond liner. If you are very careful about dam liners- ROLL don't Slide

PFDKW

Some can slide...

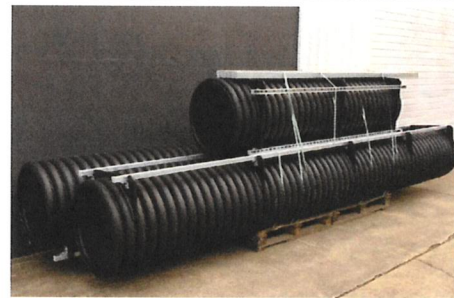

Some can just stand!

PFSM + SPS

Float modules rafted for mounting pumps- can be disassembled for transport to save on freight!!

Packed for transport

Flood proof pump installation on rafted float modules

Note the pipeline float with both pipe and power cable for a twin pump set up- "power in, water out"
